

# KILLING FOR DESEASE CONTROL

Electrical Methods for  
Lambs:

# Possible problems

- Very young animals; good restraint
- Very thick wool; wet wool or shave patch.
- Making sure dead not stunned; corneal reflex heart beat respiration

# Advantages of the electrical methods

- It kills the animals, that means we do not need to bleed them;
- It is a fast method;
- It is safe;
- No enviroment contamination;

# Composition of the team

- The Official Veterinarian must be present;
- The animal handlers;
- The killing people;
- May need shifts
- Need to estimate time
